To,
The recruiter
Google,
Bangalore,

Dear Recruiter,

I am currently a final year MSc. Data Science student. I have published a paper titled as "Morphing Attacks Detection" based on computer vision. Image processing techniques at CMR University, Bangalore.

- Python is my key trait to learn data pre-processing, machine learning, natural language processing, deep learning.
- Machine learning deep learning are the major research interests using python programming.
- I have learnt SQL since UG now further molded NoSQL database terminologies such as MySQL, MongoDB, Neo4j.
- After that, I have developed interest in Big Data management using HDFS, Hive, Pig, PySpark.
- Data visualization is being my graphical interest as it can evolve raw, unprocessed data into statistical, graphical and much interesting story telling about data.

Having work license in India. Have an experience of 1.6 years as Operations Executive at Infosys Ltd.,

I am much endeavored to work as pre-doctoral researcher in an organization like you since you people cordially inviting young graduates to explore high in demand projects.

Thank you for your consideration.

Sincerely,

Swathi
